

Engineered for results!

The pattern of pressure pan readings allows for quick identification of major leakage sites. It can be used to locate significant leakage and to tell technicians if they have air sealed the problem area. No taping off of registers and grilles is required for an extremely quick diagnostic procedure.

What's Included:

- *Two pressure pans – 12"x16" and 24"x24"*
- *4 to 8 ft. positive attachment extension pole*
- *Pressure Hose*

Optional manometer and longer poles are also available.
